

# Sheffield Honey Farm Manuka & Leatherwood Honey

Blended by  
our bees in  
the remote  
wilderness

## What is it?

We let our bees blend the nectar harvested from Manuka flowers and Leatherwood flowers and we collect the resulting honey, which is minimally processed to produce this new special Australian Honey Products Tasmanian Honey blend.

Manuka Honey has its own sweet, tasty, and rich flavour, which matches beautifully with the spicy undertones and distinctive flavour of Leatherwood Honey.

## About Us

Australian Honey Products Pty Ltd is a family owned and operated business, with Lindsay Bourke, Managing Director and Yeonsoon Bourke, Director.

The company operates from both Sheffield and Launceston, moving its hives throughout all of the island state of Tasmania. Located in Sheffield is the Sheffield Honey Farm processing facility where all of the companies honey is extracted using a state of the art facility. This was built in 2015/2016 and contains the most modern and largest extracting facility in Australia.

The Launceston head quarters are located at the Invermay depot, which also holds the Northern Beekeeping crew and their equipment. The company has HACCP, B-Qual and Organic Certification.

Australian Honey Products is proud to be the longest established commercial apiary businesses in Tasmania.
